

GAGGAA

The image displays the DNA sequence GAGGAA in a stylized, multi-colored font. The letters are arranged in two rows. The top row contains a large orange 'G', followed by two green 'A's, and another large orange 'G'. The bottom row contains a blue 'C', followed by a large orange 'G', and a red 'U'. Each letter in the bottom row is positioned directly below a letter in the top row, suggesting a base-pairing relationship. The letters are thick and blocky. Below the letters in the bottom row, there are faint, semi-transparent reflections of the letters in their respective colors (orange, blue, and red).
