

CAGAGU

A stylized representation of the DNA sequence CAGAGU. The letters are large and colorful: C is blue, A is green, G is yellow, and U is red. The letters are arranged in a sequence from left to right. The central 'A' is significantly taller than the other letters. The 'G' following the 'A' is positioned such that its top part overlaps with the 'A', and its bottom part overlaps with the 'G' immediately to its left, creating a loop-like structure. Below this loop, the letters 'G', 'A', and 'G' are stacked vertically, each centered under the corresponding letter in the loop above. The 'G' at the bottom left is blue, the 'A' in the middle is green, and the 'G' at the bottom right is yellow. The 'U' at the far right is red. The overall design is clean and modern, using a sans-serif font.
