

GCAGC  
UAG

The image displays a stylized DNA sequence logo. The top row consists of five large, overlapping letters: a yellow 'G', a blue 'C', a green 'A', a yellow 'G', and a blue 'C'. The bottom row consists of three smaller letters: a red 'U', a yellow 'A', and a green 'A'. The letters in the bottom row are positioned below the corresponding letters in the top row. A shadow effect is present at the bottom, where the letters 'U', 'A', and 'A' appear to cast a reflection onto the surface below them, with the shadow colors matching the letters above. The overall design is clean and modern, using a limited color palette of yellow, blue, green, and red.
